The aforementioned rejections are respectfully traversed for at least the following reasons.

Allowable Subject Matter

Claims 6 and 15 were objected to as being dependent upon a rejected base claim, but allowable if rewritten into independent form. Therefore, independent claims 1 and 33 have been amended herein to include the features of allowable claim 6 and intervening claim 3. Similarly, independent claim 12 has been amended herein to include the features of allowable claim 15. In addition, independent claim 20 has also been amended herein to include the features of allowable claim 15. Accordingly, the Applicant respectfully submits that the claims are in condition for allowance.

Claim Rejection Under 35 U.S.C. §103

The test for determining if a claim is rendered obvious by one or more references for purposes of a rejection under 35 U.S.C. § 103 is set forth in MPEP § 706.02(j):

To establish a *prima facie* case of obviousness, three basic criteria must be met. First, there must be some suggestion or motivation, either in the references themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings. Second, there must be a reasonable expectation of success. Finally, the prior art reference (or references when combined) must teach or suggest all the claim limitations. The teaching or suggestion to make the claimed combination and the reasonable expectation of success must both be found in the prior art and not based on applicant's disclosure. *In re Vaeck*, 947 F.2d 488, 20 USPQ2d 1438 (Fed. Cir. 1991).

Therefore, if the above-identified criteria are not met, then the cited reference(s) fails to render obvious the claimed invention and, thus, the claimed invention is distinguishable over the cited reference(s).
